

FUND NAME

Lower Risk Fixed Income (B1)

Investment Objective

The Lower Risk Fixed Income (B1) portfolio targets a competitive level of income yield, whilst limiting drawdowns, targeting a **time horizon of three to five years**.

It seeks to achieve this through diversified exposure across global bond capital markets with a **focus on short duration** strategies with low interest rate risk. Bond allocation will typically approximate 100%.

Investment Strategy

The portfolio is invested in 5 to 10 collective fixed income funds.

Key risks & performance calculation

Past performance should not be taken as a reliable indicator of future performance and there are no guarantees of future returns. Investment values, and the income they produce, can fall as well as rise and your capital is at risk in this portfolio.

The performance shown is with all income reinvested and after fund costs but does not allow for Tideway's advice and custody charges which is approximately 1% p.a. This will reduce the returns shown by this amount. Performance is calculated by Financial Express and is for illustrative purposes only. Returns are based on a theoretical model portfolio which each account tracks, but does not take account of cash balances.

The portfolio contains a mix of lower and higher risk funds, higher risk funds may fall further in value and any income yields may vary from the quoted amounts which are provided by the fund managers.

The costs of individual funds may vary from the stated amount which has been provided by the fund managers. All the funds within the portfolio trade daily, however in severe market conditions the fund manager may suspend trading.
